EpiCrossBorders: International Helmholtz-Edinburgh Research School for Epigenetics

Inaugural Symposium: 22nd April 2022 Institute of Genetics and Cancer

EpiCrossBorders is an initiative between Helmholtz Munich and The University of Edinburgh to promote world-class collaborative research for PhD Students.

EpiCrossBorders Topics Include:

- ‘One Health’ and the field of Epigenetics
- Epigenetics Research from Single Cells to Human Health
- Quantitative approaches to study epigenetic phenomena
- Climate Change and Environmental Stress and its impact on Epigenetics processes
- Implementing Biomedical Artificial Intelligence

Please join us in person and online to learn more about the opportunities EpiCrossBorders can offer and some interesting discovery science.

Keynote talks from:

- Maria-Elena Torres-Padilla (Munich)
- Nick Gilbert (Edinburgh)
- student talks, pitch talks, poster presentations.

See website for more details and links to join online
